JUNIOR DEVELOPER —

“

My primary goal is to apply my technical expertise all throughout the full application life cycle to ensure production and delivery of products and services that meet client specifications. Along with a competent developing team, and with strong personal knowledge, skills, I am positive that this goal can be achieved. My experience as junior developer enhanced my abilities in designing, implementing, testing, and upgrading software and web solutions. One of my objectives is to keep updated with the latest IT trends and technologies. I am confident that if given the opportunity, I can be a useful talent to the company.

- HTML5, CSS and SASS
- Javascript, Node and React
- SQL, Python, Ruby on rails
- C# and ASPnet core
- Heroku, AWS, Azure

EXPERIENCE

CodeBoxx | 2020 - present

A junior full-stack developer with 4 months of experience. I started developing through the CodeBoxx bootcamp. This opportunity that I had offers a deep understanding of web site development and information systems and covers programming languages such as HTML, Javascript, Python, Go, C#, Ruby, and Ruby on Rails. I develop code on either a PC or Mac and I learn tools such as GitHub and SQL.
